

Chemical Solvents

Michael Byrne Manufacturing supplied Chemical Solvents with a 55-gallon drum auger machine and a roll off container handling system in 2000. The drum auger has been in service every week and has been highly productive for our company and has paid for itself quickly.

Michael Byrne has provided us with the complete package application, and the service after the sale has been excellent.

We look forward to always work with Michael Byrne in the future, and continue our collaboration on any future projects.

David Weber, Facility Manager
Chemical Solvents, Inc.
